He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for..Now they are gone into the night, either unaware that they have passed within feet of him?or alert to his."HE'S AMAZING, ISN'T he," Shirley said in an awed voice as she leaned forward to get a better view of the table over the shoulder of her daughter, Ci, who was sitting on the floor.
